resource protection long-lasting easy-care

stable shape finest tips powder brush

All our cosmetic brushes are also available as vegan brushes with finest synthetic natural hair imitation.

Modern synthetic hair is very close to the natural models like goat, red sable and squirrel, as for visual appearance and application.

Besides animal protection, synthetic brushes offer other advantages: They are suitable for the allergy-prone and much easier in their maintenance than brushes with natural hair.

Why not try out yourself and ask us for samples for testing?

We will be happy to help you with the **development of your own vegan brush line** with handles and colours of your choice.
