PINSELFABRIK

KOLINSKY ART FIBRE

- the alternative to the red sable brush -

The new **KOLINSKY ART FIBRE** water colour brush **series 3560** is our alternative to sable brushes made with natural hair.

We use a special high end fibre that, thanks to its optimal combination of synthetic hair of the newest generation in various lengths and diameters, perfectly resembles the natural red sable hair.

The characteristics of this hair are

-  its excellent resilience
-  the „belly“, typical for red sable brushes
-  the fine reactive tip
-  the high colour absorption capacity and the regular, controlled colour release
-  the endurance

The **alternative to red sable brushes** with an **outstanding value for the money** and the **plus for animal welfare**.

You will find the prices in our new pricelist, samples for testing gladly upon request – see for yourself!
